

Camera Depth Buffer Behavior

Descripción

Files: CGFCameraDepthBufferBehavior.cs

Path: "CGF/Systems/Cam"

Description

Behavior that allows to change the depth texture mode of the main camera.

Reference

- **Depth Texture Mode – Dptph texture options.**
 - **None** – Do not generate depth texture.
 - **Depth** – Generate a depth texture.
 - **Depth Normals** – Generate a depth and normals texture.
 - **Motion Vectors** – Specifies whether motion vectors should be rendered if possible.

Use

Add the CGFCameraDepthBufferBehavior to the main camera and select the mode of depth texture to use.
