

Enum pop up window

Descripción

Description

Allows to search fields in a enumeration from inspector with a popup.

Reference

- **E/A** – Sorting Method. Enumeration o Alphabetically.
- **V** – Shows the index of the enumeration element.

Use

The method “BuildEnumPopUpWindow()” allows to build a popup with a search field, this field will filter the elements of a enumeration and assigns the selected element to the property.

In this example you can see the use.

```
public override void OnInspectorGUI()  
{  
    CGFEditorUtilitiesClass.BuildEnumListPopUpWindow("Label Name", "Description")  
}
```
