- **Help** – Open the CG Ps Tools online manual.
- **Save** – Save the active document.
- **Export** – Run the main behavior of the panel.

Use

Open a document, then set the export properties and press Export.

You can specify a exporting subfolder for a specific layer putting the label “¡nameofthesubfolder!” before the name of the layer. Make sure that the importing mark “¡–!” is at the beginning of the layer name before the subfolder label.
